

# CONTINUOUS TRACK LIFTER

Harsco Rail's Continuous Track Lifter (CTL) completes the initial lifts required behind track construction, ballast cleaning, and track renewal operations. After the track is supplied with fresh ballast the CTL can provide a 100+ mm lift at 5 km/h. A chain drawn below the sleepers distributes the ballast across the sleeper beds and cribs. This low maintenance machine is typically towed behind the last ballast wagon to immediately complete the initial lift.
