

Product Improvement

Bullet Projector, Patent Pending

Part # 5033792 - Surfacing Kit

Part # 5035464 - Single Ref. Lining (2 ea. Dual Ref. Lining)

Part # 5036083 - Support Arm (for Non Laser Lining Machines only)

Maintenance free LED Bullet Projector increases surfacing accuracy in tamping machines.

Benefits

- Maintenance free
- Increases machine uptime
- Improves safety
- Long life
- Expected LED lifespan of 20,000 + hours
- 90% energy efficient

SUMMARY

Harsco's Bullet Projector focuses on extending the life of machine parts and improving machine accuracy. The LED lights decrease degradation of light output over projector life and increase machine uptime overall.

PLUG AND PLAY

- Compatible with the Double Barrel Receiver
- Compatible with DC Powered Mark III, IV, and VI
- Eliminates a power relay

RUGGED DESIGN

- Solid state technology
- IP68 rated for dust and moisture protection
- Operating temperature range of -40°C to 80°C

SAFETY INFORMATION

The Bullet Projector keeps personnel on the ground by limiting maintenance in the light surfacing system. All moving parts are replaced, limiting wear on machine.
