

Product Improvement

Double Barrel Receiver

Part # 4008543 - Double Barrel Receiver Kit for Mark IV, VI and Jupiter
Mark III (24 VDC)

Part # H7122YAA - Double Barrel Receiver Kit for 127 VAC Mark I, II and III

**The Double Barrel Receiver achieves higher accuracy
in poor environmental conditions.**

Benefits

- High accuracy
- Low maintenance
- Self contained unit
- Plug and play
- Improves safety
- Increases machine uptime

SUMMARY

Harsco's Double Barrel Receiver is compatible with the Bullet Projector, and it increases accuracy in tamping operations. The Double Barrel Receiver is less susceptible to outside lights or debris, only sensing the light from the projector.

HIGH ACCURACY

- Maintains high accuracy in poor environmental conditions (fog, dust, and rain)

LOW MAINTENANCE DESIGN

- No moving parts, adjustment or focusing required

PLUG AND PLAY

- Compatible with Bullet Projector
- Compatible with Jupiter control or VME system equipped machines

SAFETY INFORMATION

The Double Barrel Receiver keeps personnel on the ground by limiting maintenance in the light surfacing system.
