Mark IV Remanufactured Vibrator Assembly and Combo Clamp

Part # C0607VAAEX (Remanufactured Vibrator Assy Exchange)

Part # C7608VAKEX (Remanufactured Standard Combo Clamp)

Part # G8585VADEX (Remanufactured Jupiter Combo Clamp)

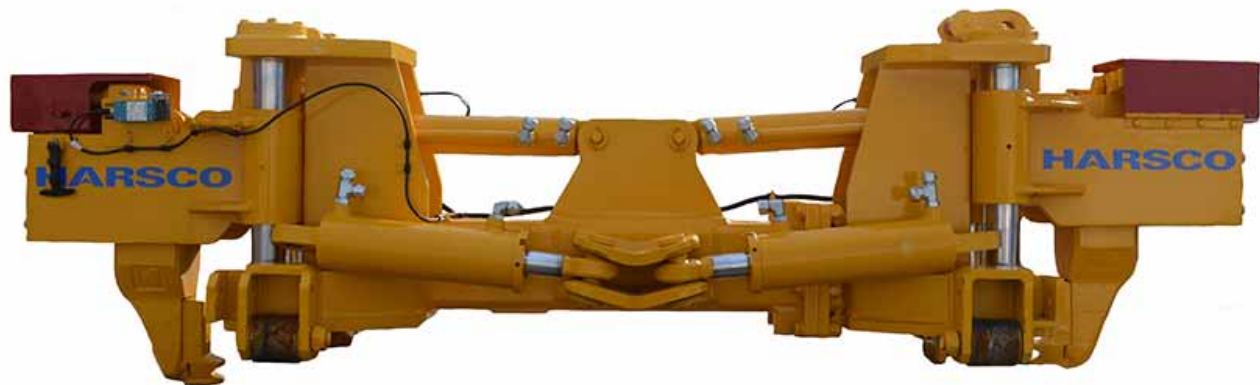

## Remanufactured to OEM Specifications with OEM Parts

### Summary

As the original manufacturer of the equipment, Harsco provides superior Remanufactured Components and Assemblies which extend the life expectancy of your machine.

### Benefits:

- Remanufactured to OEM specifications with OEM parts
- All parts are inspected for repair or replacement
- OEM standard warranty provided

### Remanufactured Combo Clamp:

- Applicable to any standard gauge Mark IV – choose the wiring option (VME or Jupiter) that matches your machine
- All hydraulic cylinders are rebuilt with new seals and spherical bearings and are 100% bench tested
- Carbide faced rail clamps, reaction pad and biasing pad assembly are standard
- All new limit switches and wiring, bearings, bushings, insulating parts, rollers, hardware and hydraulic and grease fittings are used to remanufacture the combo clamp
- Combo clamp is shipped completely painted with safety decals applied – ready to install on your machine
