

Product Improvement

Linear Transducer Kit

Part # 5044467

Linear Transducer Kit for Mark IV Tampers

The Linear Transducer Kit replaces the string pot on Harsco Rail workheads with a magnet and a non-contact linear transducer. This product improvement increases machine productivity by eliminating production loss due to string pot repair or replacement. The linear transducer has no moving parts to wear or fail.

Benefits

- Withstands vibration better than a string pot
- Part commonality with 6700, Drone Tampers, Mark IV, and Mark VI
- No moving parts to wear out or replace
- No wiring change required - uses existing Jupiter cable from string pot
