## Mark IV Squeeze Sandwich Flow Controls Kit

Part # 5043252

### Simplifying maintenance during track operation

#### SUMMARY

The Harsco Rail Squeeze Sandwich Flow Control takes input from machines and operators in the field to provide a desired solution to the end user. This new design allows a single mechanic to easily adjust the squeeze speed of each workhead from a single location. Mechanics and operators no longer have to make the adjustments from each side of the machine while communicating with each other.

#### Benefits

- Single point adjustment
- Reduced manpower to adjust (single operator)
- Remote operation keeps mechanics away from moving parts
- Reduced leak points
- Improved Reliability
- Reduced setup/adjustment time
