6700 Tamper Interactive Training Program

Part # 5013916

The Interactive Training Program educates new operators on operation, safety, and maintenance.

SUMMARY

Harsco Rail is partnering with Roadway Worker Training to create interactive training programs that actively engage with the user. The programs walk new operators through the principle of tamping, the operation of the machine, and safety on the job.

The interactive course structure uses video, graphics, and hyperlinked resources to assist in training new operators. Employees are able to learn at their own pace with interactivity. It is everything you need for effective training of employees and operators.

SAFETY INFORMATION

The training programs give direct access to maintenance and operation knowledge, increasing safety and performance.
