SERVICE BULLETIN

MAINTENANCE OF WAY EQUIPMENT

DATE: 9-2013

BULLETIN NO: 13-012

TITLE: Obsolete Version 6 Series and Prior CCL / ACL Replacement

RATING:

<input type="checkbox"/>	DIRECTIVE (Action Is Required)	<input type="checkbox"/>	ALERT (Potential Problem)
<input checked="" type="checkbox"/>	INFORMATION (Action Is Optional)	<input type="checkbox"/>	PRODUCT IMPROVEMENT (Enhance Product)

PRODUCT SERIES / MODEL: 6700 and 6700S Tampers

SERIAL NO: All of the Above Models

SUMMARY: The optional Computer Curve Liner (CCL), sometimes referred to as the Auto Curve Liner (ACL), for the 6700 and 6700S series of tampers was developed in the early 1980's. This option has been kept current by periodic updates through Version 6 Series. In recently years it has become increasingly difficult to maintain this option due to the electronic board level assemblies becoming obsolete. Therefore, further updates to this option will no longer take place. A Version 7 Computer Curve Liner (CCL) / Auto Work Head (AWH) Conversion has been developed which will completely replace the existing curve liner and auto-work head assemblies on the machine. The Version 7 works the same as the previous models, but incorporates current, readily available components.

OPERATIONAL IMPACT: Any Version 6 Series and prior CCL / ACL system or board level component will be tested, repaired and / or replaced for as long as replacement parts are available to HarSCO Rail. If components cannot be repaired and / or replaced the Version 7 CCL / AWH Conversion will need to be installed.

ACTION: Follow the instructions in this service bulletin to order the correct Version 7 CCL / AWH Conversion Kit for your 6700 or 6700S Tamper. Follow the instructions provided with the conversion kit to install the kit on your machine.
