Transmission Shift Permissive for 6700S Machines

Prevent shifting while machine is in motion

Part # 2002243, Transmission Shift Permissive Conversion (sn 152709 - 153411)

Part # 2003367, Transmission Shift Permissive Conversion (sn 151885 - 152708)

Benefits

- Inhibits transmission shifting until machine is stopped
- Reduces wear on shifting gear components
- Redundant speed sensors
- Operator indication of system functionality

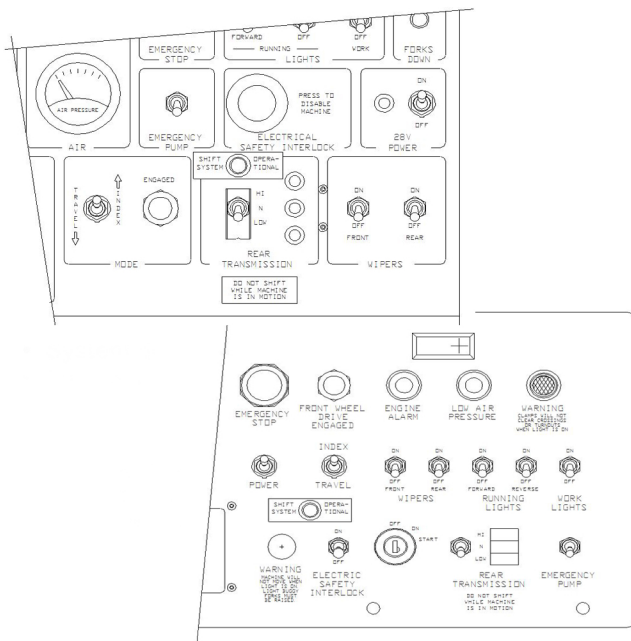

Part # 2013610, Transmission Jog Switch Conversion (for standard 6700's)

Part # 2013611, Transmission Jog Switch Conversion (for Jupiter I 6700's)

Benefits

- If gears do not mesh upon gear selection, provides a gentle means of engagement
- Reduces wear on shifting gear components
